Decks. See illustrations of types of vessels in Appendix. Explanations of such terms as *Shade dk.*, &c., are included in the alphabetical key, see pages xxxviii to xl.

As from 1st July, 1934, the form of the notation of decks has been altered.

Where no record of decks appears it is to be assumed that the vessel has only one continuous deck.

3 Dk. rule.......This notation indicates that the vessel has been built according to the Rules for three-decked vessels.

Special Surveys. Explanations of records of special periodical surveys will be found in the alphabetical key, see page xl. The records only certify to the vessel's state of efficiency *at the time of survey.*

Ports of Survey. The contractions (such as Lon., Syd., &c.), used to denote the ports at which vessels have been surveyed, are explained on page xlii.

The material of construction is steel unless otherwise stated.

Rig, &c. Explanations of contractions used to denote the rigs of vessels will be found in the alphabetical key, see pages xxxviii to xl.

Late Names. The figures following a late name of a vessel indicate the year in which the change of name took place.

Sailing Vessels, columns 3 & 4.

Master. The figures which follow the master's name, thus, *Smith* 30–40, indicate the dates of his appointment (1) as master in the service of the present owner of the vessel, and (2) as master of the vessel herself.

Steamers & Motorships, column 4; Sailing Vessels, column 5.

Tonnage. The tonnage recorded in the Register Book in type like that shown at the side hereof is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the vessel belongs.

Classification of Lloyd's Register.

100A1.........
90A1 .... Characters of vessels built of Iron or Steel according to Rules of the Society since 1869. The numerals 100, 90, &c., do not signify terms of years, but are intended for the purpose of comparison only.

A1.................This character (without a numeral prefixed) is assigned to Iron or Steel vessels built for special purposes or trades, to the satisfaction of the Committee.

Â1 Â1.......Characters of Iron vessels built according to the Rules of the Society in force between the years 1864 and 1871.

* Â1...........Character of Iron vessels built with thicker plating than required for Â1

A1.................Character of Wood or Composite vessels of the first class well and sufficiently equipped. The figures in column 5 (Steamers and Motorships), column 6 (Sailing Vessels), prefixed to the character indicate the term of years for which the vessel is at present classed, thus :—11A1, Cont 6A1, Rest 6A1. (See notes in alphabetical key, pages xxxviii to xl, under "Cont" and "Rest.") The figures in column 7 (Steamers and Motorships), column 8 (Sailing Vessels), indicate the expired terms of years originally assigned, if on the first line, and assigned on continuation if on lower lines.

A1...............Character of wood vessels which have passed the pe assigned on original Survey, or Continuation, or Restorat and of vessels not having an original character, which found to be fit to carry dry and perishable goods. term of years for which this character is assigned app under the class in column 5 (Steamers and Motorsh column 6 (Sailing Vessels), thus :— SSPly.40–6yrs.

1.....................The figure 1 included with the characters, as printed ab signifies that the vessel is well and efficiently equip as per Tables 53, 54 & 55 (see the Society's Rules).

The letters *a*, *a*†, *b*, *b*†, &c., in column 7 (Steamers Motorships), column 8 (Sailing Vessels) indicate Equipment letter given in the Rules.

The figures 1⅞, 2¼, &c., under the equipment letter, indi the sizes of chain cables specially supplied or appro which are not in accordance with the size correspondin the equipment letter.

— ....This sign placed after a character, in the position usu occupied by the figure 1, indicates that the equipmen the vessel—either as regards its quality or its quanti does not fulfil the requirements of the Society's Rules.

✠..................This sign denotes that the vessel has been built u Special Survey.

✠ ....This sign denotes that the engines or the boilers, or (according to the record which follows), have been under Special Survey.

—— 6,40 ....A black line, with date underneath, indicates that vessel's character was expunged from the Register B at the date specified because from reported defects vessel was not entitled to retain her classification.

... 6,40 ....This sign, recorded with date in column 5 (Steamers Motorships) and column 6 (Sailing Vessels), indicates the vessel's class was withdrawn from the Register Boo the Owner's request.

Examined 6,40 ...Indicates that a general examination was held at that at the port indicated in red in column 6, in lieu of overdue special periodical survey, which has been postp for the time being in the present war conditions.

Examined LR 6,40 Indicates that the vessel, which was classed in an Register, has been surveyed by the Society's Surveyo that date.

~~100A1~~.........When a posting of loss, condemnation, casualty, & made against a classed vessel, the character is expung this manner.

with freeboard This notation under the character signifies that the board assigned is a condition of the vessel's class.

Symbols of Classification of the late Underwriters' Registry

(Amalgamated with Lloyd's Register in 1885.)

A1* A1*...Characters of Iron, Steel, or Composite vessels
A1, A1, according to the Rules of the Underwriters' Registr

Vessels classed in red were built under the inspecti the Surveyors to the Underwriters' Registry.

The figure 1 affixed to Symbols of Classification sig the Character of Equipment.

Date of Survey. The figures under a character denote the date wh vessel was last surveyed. The *date of survey* only ce to the vessel's state of efficiency *at that time.*

Ports of Survey. An explanation of contractions used to indicate surveying ports will be found on page xlii.

The 6th, 7th, and 8th columns (Sailing Vessels), or 5th, 6th, and 7th columns (Steamers & Motorships) left blank, indicate that the vessel has never been classed in the Register Book.

When the 6th (Sailing Vessels) or 5th (Steamers) column is left blank, except as regards the date of survey last recorded, it indicates that the character has expired, or that it has been withdrawn either for want of survey or on account of non-payment of fees due in the case.

Steamers & Motorships, column 7*.

Date when the Tail Shaft was last seen. The letter N preceding the date of last survey of the tail shaft (thus N 6,40) indicates that the tail shaft had not been used prior to that date. The letters P and S indicate respectively the last survey of *port* and *starboard* shafts.

Continuous Liners. The letters CL in this column denote that the shaft is fitted with a continuous liner, and apply to the shaft or shafts whose survey dates appear beneath.

Oil Gland. The letters OG denote that the shaft is fitted with an approved oil-retaining gland at the after end of the stern bush and apply to the shaft or shafts whose survey dates appear beneath.

Steamers & Motorships, column 8; Sailing Vessels, column 9.

Date of Build. In the case of Iron and Steel vessels classed by Lloyd's Register, the date of build recorded in the Register Book is in accordance with the Rules. In the case of classed Iron and Steel vessels launched prior to the 19th May, 1887, and also in the case of all classed Wood and Composite vessels, the date of launch is reckoned as the date of build. For vessels not classed by Lloyd's Register, it is not possible to define whether the date of build is the date of launch or the date of completion.

Records such as $18\substack{65\\94}$ occur in the case of some unclassed vessels. These denote that the vessel was originally built at the date indicated by the upper figures, and is reported to have been rebuilt at the date indicated by the lower figures. In such cases, the Society has no authoritative information as to the extent to which the reported rebuilding has been carried out.

Steamers & Motorships, column 10; Sailing Vessels, column 12.

Owners. In the case of vessels of British Registration, the name recorded in the Register Book is that of the Managing Owner, or of the firm in which the Managing Owner is a partner. When there is not a Managing Owner appointed, the name of the largest shareholder is recorded; and the name of the Manager of the vessel is also noted if desired. In the case of colonial or foreign vessels, however, obvious difficulties render it impossible to ensure that a person entered as Managing Owner is in every instance a legal owner. He may sometimes be only the *Manager* of a vessel as distinguished from Managing *Owner*.

Steamers & Motorships, column 11; Sailing Vessels, column 13.

Dimensions. The Registered dimensions of vessels in these columns are recorded in feet and tenths of a foot.

Length. When two lengths are recorded thus: $\genfrac{}{}{0pt}{}{315\cdot3}{304\cdot0}$ the upper figures denote the length according to the Official Register of the vessel, and the lower figures according to British practice

In the cases of classed vessels the over-all length is also recorded as and when measured by the Society's Surveyors and is indicated by the letters O.L. in parentheses, thus:—325·5(O.L.). In the cases of Italian and Finnish vessels the registered length is to be regarded as an over-all length except where recent changes of flag have taken place and the new registered dimensions are not yet available.

Breadth. When two breadths are recorded thus: $\genfrac{}{}{0pt}{}{50\cdot9}{53\cdot2}$ the upper figures denote the breadth according to the Official Register of the vessel, and the lower figures the extreme breadth to outside of plating. In the cases of some steamers of small tonnage, mostly of the coasting type, the extreme breadth over belting is recorded in italics thus: *25·4*

Depth. When two depths are recorded thus: $\genfrac{}{}{0pt}{}{17\cdot9}{25\cdot7}$ the upper figures denote the depth according to the Official Register of the vessel, and the lower, the depth in hold from the uppermost continuous deck. In some countries the registered depth is the same as the moulded depth.

Deck Erections. See illustrations of types of vessels in Appendix.

Water Ballast. See explanations and illustrations on page xli of key.

Steamers & Motorships, column 12; Sailing Vessels, column 14.

Port of Registry. The Port of Registry is shown in Roman type, while a port recorded in italics will be the vessel's Home Port, as distinct from the Port of Registry.

Water Ballast. See explanations and illustrations on page xli of key.

Steamers & Motorships, col. 14; Sailing Vessels, col. 15.

Moulded Depth. The moulded depth of an Iron or Steel vessel is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the vessel, to the top of the keel and the bottom of the frame at the middle line. In Wooden and Composite vessels the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the vessel amidships to the lower edge of the rabbet of the keel.

In Wooden and Composite vessels where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line of the flat of the bottom cuts the keel. Fractions of an inch are not recorded.

Draught. The "corresponding draught" for all cases recorded prior to August, 1923, is the calculated *mean* draught of water from bottom of keel to centre of load line disc and fractions of an inch are not recorded. Subsequent to that date the actual draught to the nearest quarter of an inch, as supplied by the respective Shipbuilders, is recorded.

TABLE EXPLICATIVE CONCERNANT
LE REGISTRE.

1940-41.

EXPLICATIONS DES ANNOTATIONS DU "LLOYD'S REGISTER BOOK."

(Toutes les abreviations du "Lloyd's Register Book" se trouvent expliquées dans la Table Explicative, voir page xlvi.)

Navires à Vapeur et à Moteurs, colonnes 2 et 3; Navires à Voiles, colonnes 3 et 4.

Ponts.	Voir les dessins des différents types de navires dans l'Appendice (Vol. II). Les explications des termes tels que *shade dk.*, etc., sont fournies dans la Table Explicative, voir pages xlvi à xlviii. A partir du 1^{er} Juillet 1934, des changements ont été apportés aux annotations concernant les ponts. Lorsqu'il n'est pas fait mention de ponts, il y a lieu d'assumer que le navire n'a qu'un seul pont continu.
3 *Dk. rule*	Cette annotation indique que le navire a été construit d'après les règlements pour les navires à trois ponts.
Visites Périodiques.	L'explication de l'enregistrement des visites spéciales périodiques se trouve dans la Table Explicative, voir page xlviii. L'enregistrement indique seulement la condition du navire à l'époque de la visite.
Ports de Visite.	Les abréviations telles que (Lon., Syd., &c.), employées pour indiquer les ports où les navires ont été inspectés, sont expliquées à la page l. Le matériel de construction est l'acier, sauf indication contraire.
Gréement, etc.	Les abréviations employées pour spécifier le gréement des navires sont expliquées dans la Table Explicative, voir pages xlvi à xlviii.
Anciens Noms.	Les chiffres à la suite d'un ancien nom de navire indiquent l'année pendant laquelle le changement de nom a eu lieu.

Navires à Voiles, colonnes 3 et 4.

Capitaine.	Les chiffres à la suite du nom du capitaine, ainsi, *Smith* 30–40, indiquent (1°) l'année où il est entré comme capitaine au service de l'armateur, (2°) l'année où il a pris le commandement du navire.

Navires à Vapeur et à Moteurs, colonne 4; Navires à Voiles, colonne 5.

Tonnage.	Le tonnage qui figure sur le "Lloyd's Register Book" en caractères comme ci-contre, est à part quelques rares exceptions, le tonnage officiel mesuré d'après les lois du pays auquel le navire appartient.	3101 (Total) 2864 (Sous le pont) 1994 (Net)
	Pour quelques navires étrangers, le tonnage qui figure a été mesuré d'après la méthode Anglaise, et est reconnu par la loi Anglaise. Dans ce cas le fait est mentionné par l'emploi de caractères italiques, comme ci-contre.	*3101* (Total) *2864* (Sous le pont) *1994* (Net)

NOTE :—Quand les chiffres de tonnage sont marqués de traits fins rouges, cela signifie que ces chiffres sont incorrects par suite de l'ouverture ou de la fermeture d'ouvertures de tonnage, et que les nouveaux tonnages n'ont pas encore été reçus.

Navires à Vapeur et à Moteurs, colonnes 5, 6 et 7; Navires à Voiles, colonnes 6, 7 et 8.

Marques de Classification du Lloyd's Register.

100A1 90A1	Cotes des navires en fer ou en acier, construits conformément aux règlements de la Société depuis 1869. Les nombres 100, 90, &c., n'indiquent pas une période d'années, mais ne servent que de terms de comparaison.
A1	Cette cote non précédée d'un nombre, s'applique aux navires en fer ou en acier, construits à la satisfaction du Comité pour des usages ou des voyages spéciaux.
△A1 △B1	Cotes des navires en fer construits conformément aux règlements de la Société en vigueur de 1864 à 1871.
* △A1	Cotes des navires en fer construits avec des tôles plus épaisses que celles réclamées pour la cote △A1.
A1	Première cote des navires en bois ou composites dont l'armement est bon et suffisant. Les chiffres qui précèdent la cote, colonne 5 (navires à vapeur et à moteurs), colonne 6 (navires à voiles), indiquent le nombre d'années pour lesquelles le navire a été coté, ainsi :—11A1, Cont 6A1, Rest 6A1. (Voir "Cont" et "Rest" dans la Table Explicative, pages xlvi à xlviii.) Les chiffres dans la colonne 7 (navires à vapeur et à moteurs), colonne 8 (navires à voiles), indiquent les périodes expirées pour lesquelles les navires avaient été cotés. A la première ligne ces chiffres indiquent la période originelle, aux lignes suivantes les périodes de continuation.
A1	Cotes des navires en bois pour lesquels les périodes assignées soit originellement, soit par Continuation ou par Restauration sont expirées, ou cote des navires qui n'ont jamais eu de cote originelle mais qui sont jugés aptes à transporter des marchandises sèches et périssables. Le nombre d'années pour lesquelles la cote a été assignée figure sous la cote dans la colonne 5 (navires à vapeur et à moteurs), colonne 6 (navires à voiles), ainsi :— SSPly.40–6yrs.
1	Le chiffre 1 imprimé comme ci-contre et faisant partie de la cote, indique que le navire a un armement bon et suffisant conformément au Tabl. 53, 54 & 55 (voir règlements de la Société). Les lettres *a*, *a*†, *b*, *b*†, etc., dans le colonne 7 (navires à vapeur et à moteurs), colonne 8 (navires à voiles), indiquent la lettre d'armement d'après les règlements. Les chiffres $1\frac{7}{8}$, $2\frac{1}{4}$, etc., au-dessous de la lettre d'armement, indiquent la grandeur de câble-chaîne spécialement fournie ou approuvée et non-conforme à la grandeur correspondant à la lettre d'armement.
—	Ce signe à la suite d'une cote, à la place occupée par le chiffre 1, indique que l'armement du navire ne répond pas aux exigences des règlements de la Société, soit comme qualité, soit comme quantité.
✠	Ce signe indique que le navire a été construit sous surveillance spéciale.
✠	Ce signe indique que les machines ou les chaudières, ou toutes les deux (suivant l'annotation dont il est suivi) ont été construites sous surveillance spéciale.
— 6,40	Une ligne noire avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de défectuosités signalées.
— 6,40	Une ligne rouge avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de dérogation aux règlements de la Société en ce qui concerne les visites.
… 6,40	Ce signe, inséré avec date dans la colonne 7 (navires à vapeur et à moteurs) et colonne 8 (navires à voiles), indique que la cote du navire a été retirée du "Lloyd's Register Book" à la demande de l'armateur.
Examined 6,40	Signifie qu'une inspection générale a eu lieu à cette date, au port indiqué en rouge dans la colonne 6, en remplacement de la visite périodique spéciale échue, laquelle est momentanément ajournée par suite de la guerre.
Examined LR 6,40	Signifie que le navire, qui était coté auprès d'un autre Registre, a été inspecté par les Inspecteurs de la Société à la date, indiquée.
~~100A1~~	Quand un navire coté est mentionné comme perdu, condamné ou ayant tout autre accident, &c., la cote est rayée comme ci-contre.
with freeboard	Cette mention sous la cote indique que le franc-bord assigné est une condition de la cote du navire.
Awng dk., *Shade dk.,* *Shelter dk., &c.*	Voir les dessins des différents types de navires dans l'Appendice (Vol. II). Les explications des termes tels que shade deck, awning deck, shelter deck, &c., sont données dans la Table Explicative, voir pages xlvi à xlviii.

Marques de Classification de l'ex Underwriters' Registry.

(Réuni avec le Lloyd's Register en 1885.)

A1* A1* A1, A1,	Cotes des navires en fer, en acier ou composites, construits conformément aux règlements de l'Underwriters' Registry. Les navires cotés en rouge ont été construits sous la surveillance des Inspecteurs de l'Underwriters' Registry. Le chiffre 1 à la suite des marques de classification indique la cote de l'armement.
Date de Visite.	Les chiffres sous une cote indiquent la date de dernière visite. La date de visite certifie seulement la condition du navire à ce moment.
Ports de Visites.	Les abréviations employées pour indiquer les ports de visites sont expliquées à la page l. Les 6me, 7me, et 8me colonnes (navires à voiles) ou les 5me, 6me, et 7me colonnes (navires à vapeur et à moteurs) laissées en blanc, indiquent que le navire n'a jamais été coté dans le "Lloyd's Register Book." La 6me colonne (navires à voiles) ou la 5me colonne (navires à vapeur) laissée en blanc, sauf en ce qui concerne l'époque de la dernière visite enregistrée, indique que la cote est expirée ou bien qu'elle a été rayée soit pour manque de visite, soit pour non paiement des honoraires dûs dans ce cas.

Navires à Vapeur et à Moteurs, colonne 7*.

Date de la dernière Visite de l'arbre porte-hélice. La lettre N précèdant la date de la dernière visite de l'arbre porte-hélice (par exemple N 6,40) signifie que l'arbre porte-hélice n'avait pas été utilisé avant la date indiquée. Les lettres P & S serviront à désigner respectivement les arbres porte-hélice de *Bâbord* et de *Tribord*.

Chemises continues. Les lettres CL dans cette colonne indiquent que l'arbre est pourvu d'une chemise continue, et concernent le ou les arbres dont les dates d'inspection figurent au-dessous.

Presse-garnitures à huile. Les lettres OG indiquent que l'arbre est muni, à la partie arrière du tube d'étambot, d'un presse-garnitures agrée pour retenir l'huile, et concernent le ou les arbres dont les dates d'inspection figurent au-dessous.

Navires à Vapeur et à Moteurs, colonne 8 ; Navires à Voiles, colonne 9.

Date de Construction. Dans le cas des navires en fer et en acier classés au Lloyd's Register, la date de construction inscrite dans le Registre est conforme aux Règlements. Pour les navires en fer et en acier cotés et lancés anterieurement au 19 Mai 1887, ainsi que pour tous les navires cotés en bois et composites, la date du lancement est considérée comme étant celle de la construction. Pour les navires non cotés par le Lloyd's Register, il n'est pas possible de spécifier si la date de construction est celle du lancement ou celle de l'achèvement des travaux.

Des annotations telles que 18^{65}_{94} figurent pour quelques navires non cotés. Les chiffres supérieurs indiquent alors la date originelle de la construction, les chiffres inférieurs la date à laquelle le navire a été rapporte comme reconstruit. Dan ce cas la Société ne peut spécifier l'importance de la reconstruction.

Navires à Vapeur et à Moteurs, colonne 10 ; Navires à Voiles, colonne 12.

Armateurs. Pour les navires de la Grande Bretagne et de l'Irlande, le nom qui figure sur le "Lloyd's Register Book" est celui de l'armateur-gérant ou celui de la Société dont l'armateur-gérant fait partie. Lorsqu'il n'y a pas d'armateur-gérant, le nom qui figure est celui du plus gros actionnaire et le nom du gérant figure aussi, si on le demande. Pour les navires coloniaux et étrangers, de sérieuses difficultés empêchent de certifier qu'une personne mentionnée comme étant armateur-gérant est, dans chaque cas, l'armateur légal. Dans certains cas la personne dont le nom figure peut n'être que *gérant*, ce qui est absolument distinct *d'armateur-gérant*.

Navires à Vapeur et à Moteurs, colonne 11 ; Navires à Voiles, colonne 13.

Dimensions. Les dimensions de douane des Navires, dans ces colonnes sont indiquées en pieds et en dixièmes de pieds.

Longueur. Lorsque deux longueurs sont mentionnées, ainsi $\frac{315\cdot3}{304\cdot0}$, les chiffres supérieurs indiquent la longueur d'après le Registre officiel national du navire et les chiffres inférieurs la longueur d'après la pratique anglaise. Dans le cas des navires classés, la longueur hors tout est aussi mentionnée, quand et comme mesurée par les Inspecteurs du Lloyd's Register, et est indiquée par les lettres O.L. entre parenthèses, ainsi 325·5(O.L.). Dans le cas des navires italiens et finlandais, la longueur de douane est à considérer comme une longueur hors tout, sauf lorsqu'un récent changement de nationalité a eu lieu et que les nouvelles dimensions de douane ne sont pas encore connues.

Largeur. Lorsque deux largeurs sont mentionnées, ainsi $\frac{50\cdot9}{53\cdot2}$, les chiffres supérieurs indiquent la largeur d'après le Registre officiel national du navire et les chiffres inférieurs la largeur extrême allant jusqu' au côté extérieur du borde. Dans le cas de quelques vapeurs de jauge peu importante et principalement de cabotage, la largeur extrême, y. compris la ceinture, est mentionnée en italique comme suit : *25·4*

Creux. Lorsque deux creux sont mentionnés, ainsi $\frac{9}{25\cdot7}$, les chiffres supérieurs indiquent le creux d'après le Registre officiel national du navire et les chiffres inférieurs le creux dans la cale depuis le pont continu supérieur. Dans quelques pays, le creux du Registre est le même que le creux sur quille.

Toutes les abréviations employées se rapportant aux Machines, Chaudières, Foyers, &c., sont décrites dans la Table Explicative, voir pages xlvi à xlix.

Force en Chevaux nominaux NHP La force en chevaux nominaux est calculée pour les machines alternatives à vapeur d'après les formules suivantes :—

1°. Si les pressions et les surfaces de chauffe sont connues :—

$$\text{NHP} = \frac{P + 23{,}9}{70{,}3}\left(\frac{D^2\sqrt{S}}{1028} + 0{,}72\,H\right)$$ pressions au-dessous de 11.25 kgs. par centimètre carré.

$$= \frac{P + 41{,}5}{105{,}5}\left(\frac{D^2\sqrt{S}}{1028} + 0{,}72\,H\right)$$ pressions de 11,25 kgs. et au-dessus.

Pour calculer la puissance nominale des turbines à vapeur, substituer $\frac{\text{SHP}}{6}$ (SHP étant le puissance totale sur l'arbre) à la place de $\frac{D^2\sqrt{S}}{1028}$ dans les formules précédentes.

Pour les chaudières à tirage forcé ou à tirage induit, on doit substituer dans les formules ci-dessus 0,90 H à 0,72 H.

2°. Si les pressions et les surfaces de chauffe ne sont pas connues :—

$$\text{NHP} = \frac{D^2\sqrt{S}}{1028}$$ Machines à Triple et Quadruple expansion

$$\text{NHP} = \frac{D^2\sqrt{S}}{1233}$$ Machines Compound.

$$\text{NHP} = \frac{D^2\sqrt{S}}{1337}$$ Machines Simples.

Dans les formules ci-dessus, D = diamètre en centimètres du Cylindre B.P.
S = Course du piston en centimètres. H = Surface de chauffe en mètres carrés.
P = Pression de travail en kilogrammes par centimètre carré.

Pour les navires pourvus de moteurs á huiles lourdes :—

$$\text{NHP} = \frac{C \times N \times D^2}{\frac{S}{D} + 50}$$

où NHP = Pouissance en chevaux nominaux.
N = Nombre de cylindres.
D = Diamètre des cylindres en millimètres.
S = Course de piston en millimètres; dans le cas de moteurs du type à pistons opposés, S est la moitié de la course combinée des pistons.
C = 0·00775 pour les moteurs à 4 temps simple effet.
= 0·0155 pour les moteurs à 4 temps double effet.
= 0·0140 pour les moteurs à 2 temps simple effet.
= 0·0280 pour les moteurs à 2 temps double effet.
= 0·0248 pour les moteurs à 2 temps simple effet, à pistons opposés.

Pour les navires pourvus de moteurs á essences ou á pétrole :—

$$\text{NHP} = \frac{\text{BHP}}{3\cdot5}$$ formule dans laquelle BHP représente les chevaux en frein toute force.

Force Officielle en Chevaux RHP Cette annotation indique la force en chevaux nominaux d'aprés le Registre Officiel du navire, dans le cas de navires britanniques.

Turbines à Engrenages. Les lettres S.R. indiquent qu'un engrenage à simple réduction est installé entre les machines principales et l'arbre porte-hélice. Les lettres D.R. indiquent qu'un engrenage à double réduction est installé entre les machines principales et l'arbre porte-hélice.

Machines à pétrole et à gaz. 4S.C. indique Cycle à 4 temps. SA indique simple effet. 2S.C. indique Cycle à 2 temps. DA indique double effet.

Water Ballast. Voir explications et dessins à la page xlix de la Table Explicative.

Navires à Vapeur et à Moteurs, colonne 14 ; Navires à Voiles, colonne 15.

Creux sur quille. Le creux sur quille pour les navires en fer et en acier, est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur sur le coté et au milieu de la longueur du navire, jusqu'à hauteur de la rencontre de la face inférieure de la membrure avec le dessus de la quille sur la ligne médiane. Pour les navires en bois et composites, le creux sur quille est la longueur de la perpendiculaire abaisée depuis la face supérieure des barrots du pont supérieur jusque'à hauteur de l'arête inférieure de la rablure de quille. Pour les navires en bois et composites dont les parties inférieures sont frégatées (lorsqu'un navire est pourvu par exemple de galbords épais) le creux sur quille n'est alors calculé que jusqu'à hauteur de l'intersection de la ligne prolongée des fonds avec la quille. Les fractions d'un pouce ne sont pas mentionnées.

Tirant d'eau. Le "tirant d'eau correspondant," pour tous le cas mentionnés avant août, 1923 est le tirant d'eau moyen calculé depuis le fond de la quille jusqu'au centre du disque de la ligne de charge ; et les fractions de pouce ne sont pas mentionnées. Après cette date, le tirant d'eau actuel, au quart de pouce le plus voisin, et tel qu'il a été indiqué par les constructeurs de navire, est mentionné.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

*** Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.

⁂ Additional Ships are inserted in the Supplement at the end of the Register.

N.B.—All vessels assigned a character in the Register Book are required, under the Rules of the Society, to be submitted to Surveys by the Society's Surveyors periodically (annually, if practicable), in order to its being seen that their efficiency is duly maintained. It is also a condition that all repairs of ships or machinery required at ports where there is a Surveyor to this Society, in order to their retaining the characters assigned to them in the Register Book, must be carried out under the inspection and to the satisfaction of the Society's Surveyors. Ships or machinery repaired at ports where there is no Surveyor to this Society must be surveyed by one of the Society's Surveyors at the earliest opportunity.

The *Date of Survey* of a ship only certifies to its efficiency at that time.

In reference to the Rules of the Society, and in order to prevent the disappointment arising from ships losing their characters from want of Survey, it is hereby intimated that the duty of giving *Notice of Periodical Surveys* required by the Rules, or when repairs are necessary in consequence of damage, or from other causes, rests with the Owners, Masters, or Agents.
